

“ Fette Die Segment Storage Solutions ”

Fette Die Segment Storage - NEWS

So many Die Segments but no where to store them!

Die segment storage cabinets from Casburt TMS Ltd. have been designed and developed to meet the specific needs of storing Fette Die Segments.

It's unique design includes secure die segment positioning, lockable drawers, telescopic arms, anti-tip system, labelling and adjustable feet.

The storage cabinets come in sizes to suit 3 or 5 segment storage per drawer with 6 drawers per cabinet. Drawers are fitted with a die segment support system preventing knocking of segments whilst enabling easy access for handlers.

Each 6 drawer cabinet is designed to slide under existing worktop units and are available in powder coated or stainless steel finishes. Standalone cabinets are also available.

Die segment storage cabinets are both secure and very easy to use enabling handlers quick and easy access to load and unload die segments.

The solution was development after demands from customers and tested by Casburt's Punch and Die production section who are the European distributors of punches and dies for Natoli Engineering, the only officially authorized producer of Fette Die Segments in the world.
